DISCLAIMER: The original, authoritative version of this manual is the English version produced by ROXELL bvba. Subsequent changes to any manual made by any third party have not been reviewed nor authenticated by Roxell. Such changes may include, but are not limited to, translation into languages other than English, and additions to or deletions from the original content. Roxell disclaims responsibility for any and all damages, injuries, warranty claims and/or any other claims associated with such changes, inasmuch as such changes result in content that is different from the authoritative Roxell-published English version of the manual. For current product installation and operation information, please contact the customer service and/or technical service departments of Roxell. Should you observe any questionable content in any manual, please notify Roxell immediately in writing to: ROXELL bvba - Industrielaan 13, 9990 Maldegem - Belgium.
General information

IMPORTANT: These instructions must be read, understood and all points observed by the user, the responsible and operating personnel.

Obey the legal regulations and the applicable rules

This concerns, among other things, the European regulations and directives transposed into national legislation and/or the laws, safety and accident prevention regulations that apply in the user’s country.

During assembly, operation and maintenance of the installation the legal regulations concerned and the applicable technical rules must be obeyed.

Intended use

The installation has been designed solely for intensive livestock use and has been developed according to the applicable rules of good workmanship. Extra loading of the product is therefore prohibited. Any other use is considered to be improper use. The manufacturer is not responsible for damage resulting there from. The user bears sole responsibility.

Not-intended use

All use different than described in “Intended use” is at the responsibility of the end user.

Liability

The (Extended) Warranty will not apply if any of the following has occurred: failure to conduct incoming goods inspection with regards to the Products, improper handling, transportation, modification or repair; accident, abuse or improper use; improper assembly, installation, connection or maintenance (having regard to Roxell’s most current assembly, installation, connection and maintenance manuals); force majeure; negligence, lack of supervision or of maintenance on the part of customer; normal wear and tear; use of cleansing agents and disinfectants that are excluded in Roxell’s most current use and maintenance manuals; use of cleansing agents and disinfectants in violation with the instructions received from the suppliers; or use of the Products in an ATEX-surrounding.

The (Extended) Warranty shall not apply in the event of a defect caused either by materials or accessories supplied by or services rendered by Customer; or by an intervention by a person or entity which is not authorised or qualified for carrying out such intervention. Furthermore, the (Extended) Warranty will only apply if the Products are used in livestock houses and if all parts or components of the Products are supplied by Roxell.

Roxell will not be liable for any damages caused due to improper use, assembly, installation, connection or maintenance of the Products. In this respect, the Customer expressly acknowledges that (i) all use, assembly, installation, connection or maintenance must be done in accordance with Roxell’s most current assembly, installation, connection and maintenance manuals and (ii) the electrical installation on which the Products must be connected must be done in accordance with applicable local legislation on electrical installations.

Furthermore, the Products must be tested both mechanically and electrically in accordance with state of the art techniques and applicable local legislation.

Personnel Qualifications

User

The person who uses a function or operation of a product for their work or who works on the product. The user must be able to read the instructions for use and fully understand them. The user has knowledge of the functioning and construction of the installation.

Technically trained person

An expert who can assemble and maintain the installation (mechanically/electrically), and resolve malfunctions. On the basis of his/her technical training and experience, he/she has sufficient knowledge to be able to assess activities, recognise possible dangers and rectify dangerous situations.

Storage

Put all parts to be assembled in a room or at a location where the not yet assembled components are protected against weather influences.
Transport
Depending on the size of the parts and according to local circumstances and local legislation, the parts of the machine have to be transported with a forklift.
The forklift must be operated by a qualified person and in accordance with the rules of good workmanship. When lifting the load, always check if the center of gravity of the load is stable.

Dismantling
Dismantle the installation and its components in accordance with the environmental legislation of the country or the local authorities applicable at that time. All functioning products and exchange parts must be stored and disposed of in accordance with the applicable environmental regulations.

Environmental information for customers in the European Union
The European legislation requires that equipment marked with this symbol on the product or packaging must not be collected with unsorted household waste. This symbol indicates that the waste electrical and electronic equipment (WEEE) cannot be disposed of in the regular household waste. We highly recommend that you bring your product to an official collection point so that an expert can remove the waste electrical and electronic equipment. Inform yourself of local legislation on separate collection of waste electrical and electronic equipment. Respect the local regulations and never dispose of the product together with household waste.

Information about waste disposal - electrical/electronic material for companies

1 In the European Union
If you have used the product for commercial purposes and you want to dispose of it, contact Roxell who will give you information about the return of the product. It is possible that you will have to pay a disposal charge for the return and recycling. Small products (and small quantities) can be processed by the local collection agencies.

2 In other countries outside the European Union
If you want to dispose of this product, contact the local authorities for information concerning the correct disposal procedure.

The level of noise emission
The noise level of the installation in operation does not exceed 70dB(A).

LOTOTO = Lock Out - Tag Out - Try Out
Everyone needs his own lock and tag (label), which can't be removed by other persons. Inform all the persons who are influenced by the procedure.

1 To block
• Localize all sources of energy (electric, hydraulic, pneumatic).
• Switch off.
• Take the relevant installation or the process out of operation and lock it against reuse.
  You can do it by placing a padlock or other blocking mechanism (Lock Out).

2 To mark
Attach a sign, label or sticker to the padlock or blocking mechanism to reveal the nature and the expected duration of the work to other persons (Tag Out).

3 To check
• Check if the source of energy is switched off.
• Remove any remaining energy.
• Check that the installation or process is actually safe (Try Out).
Use personal protective equipment.
Ensure you wear personal protective equipment (gloves, dust masks...).

**Illuminance - Sufficient lighting**
- A minimum illuminance of 200 lux is necessary during usage, maintenance and installation.
- Provide at the installation (portable) emergency lighting in case of power failure.

**Electrical equipment, control panels, components and drive units**
- To operate control panels, there must be at least 70 cm of free space.
- Control panels must always remain closed. The key of the control panel must be in possession of an authorized person.
- The necessary measures must be taken by the user to keep out rats, mice and other vermin from the control panels.
- If electrical equipment, control panels, components and drive units are damaged, the system must be stopped immediately!
- Electrical equipment, control panels, components and drive units should never be sprayed with water or other liquid!
- Electrical equipment, control panels, components and drive units should never be covered with any material.

**Information about the residual risks - used safety signs**
There are three levels of danger, which you can recognize from the signal word
* DANGER
* WARNING
* CAUTION
The nature and source of the imminent danger and possible consequences of not obeying warnings is stated here!

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="DANGER" /></td>
<td>DANGER indicates a direct imminent danger that can result in a serious or even fatal accident if the safety measures are not respected.</td>
</tr>
<tr>
<td><img src="image" alt="WARNING" /></td>
<td>WARNING indicates a possible imminent danger that can result in a serious accident or damage to the product if the safety measures are not respected.</td>
</tr>
<tr>
<td><img src="image" alt="CAUTION" /></td>
<td>CAUTION indicates possible, dangerous situations that can result in minor physical injury or material damage if the safety measures are not respected.</td>
</tr>
<tr>
<td><img src="image" alt="Information" /></td>
<td>This symbol refers to supporting information.</td>
</tr>
<tr>
<td><img src="image" alt="Allowed" /></td>
<td>Allowed</td>
</tr>
<tr>
<td><img src="image" alt="Not allowed" /></td>
<td>Not allowed</td>
</tr>
<tr>
<td><img src="image" alt="Warning" /></td>
<td>This symbol will be used to draw your attention to matters that are of great importance for your safety. It means: warning - follow the safety instructions. Disconnect the current and read the safety rules. In short: be alert. Ignoring these instructions can cause serious injuries or even death.</td>

GENERAL SAFETY RULES

Storage Line Roxell
Metal storage bins for animal feed

IMPORTANT

DANGER

Carefully read the following instructions before USING the system

Be careful!
Your safety is at stake!

- Read the User's guide and Use - & Assembly Guide carefully.
- Keep the User's guide and Use - & Assembly Guide at a safe, well accessible place.
- Use personal protective equipment (safety gloves, helmet, harness, safety line, anti-slip safety shoes, dust mask, etc.).
- Make sure that assistance is immediately available in case of trouble.

Switch off the main switch first.
Use personal protective equipment.
Avoid electrical shock.
Place the equipment in a safe area.
Protect the environment around the controller.
GENERAL SAFETY RULES

LADDERS

IMPORTANT

To enter a bin:
You can suffocate under material in the bin.
Never enter the bin when it contains material.
Before you enter a bin:
- Switch off the main switch first.
- Use a safety harness and safety line.
- Wear proper breathing equipment.
- Make sure that assistance is immediately available in case of trouble.

- Maximum weight = 200 kg
- Never climb a damaged or poorly installed ladder.
- Keep the rails free of mud or other slippery material.
- Wear anti-slip safety shoes.
- Never climb a ladder if your physical condition is not optimal:
  In case of fatigue, under the influence of medication, alcohol, drugs or if you feel unwell.
- Look at the ladder when climbing or descending. Make sure you get a good grip.
- Never use the hook-in-ladder in another application.
  Hook the ladder only into an original vertical bin ladder.
- When climbing a roof ladder, it is required to wear a safety harness and a safety line.
- Never step on the roof sections.

DANGER

Never open entry hatch when there is feed in the bin!
MAINTENANCE INSTRUCTIONS

DANGER
Switch off the main switch first.
Use personal protective equipment.

Neatness:
- Keep the bin and (surroundings) free of:
  mud, acid feed, metal scratch and contact with other metals (e.g. aluminium,...)

Corrosion:
- All parts of the silo require little maintenance.
- Do not store any substances that have corrosive impact on the bins.
- Check regularly the bin for corrosion and treat the affected parts.
- In case of rust, contact a specialist.

Feed material storage:
- You can only store good flowing (free-flowing) ingredients of feeding with a specific weight <= 6.5 kN /m³ (<= 650 kg/m³)
- Contact the supplier of the materials, you store, for information regarding cohesion and bridge forming.

WARNING
ATTENTION!
Soya coarse meal, meat scraps and many other materials are not free flowing.
You cannot store these materials in the bin!

Filling and Emptying:
- The bin may only be filled or emptied centrally.
- All other methods must be approved by Roxell in writing.
- In case you do not use the bin for a while, see that it is empty and cleaned inside.

Pneumatic filling:
- Use a good porous dust collector on the exhaust pipe.
- A blocked exhaust pipe can seriously damage your bin.
- Blowing pressure: maximum 1.2 bar.
  Higher pressure can seriously damage the bin.
