

General info			
Birds per meter trough		20 (EU) – 27	
Trough per bird (cm)		10 (EU) – 7.5	
Max. pellet diameter		4 mm	
Daily feed intake		115–125 g	
Body weight		1.450 kg at 17 weeks – 2.0 kg at 75 weeks	
Feed amount	with 70 % filling (*)	500 g	
	with 100 % filling (*)	725 g	
Feeding cycles (advised)		3–5 days	
Technical info			
Transport speed		22 m/min (50 Hz) – 26.5 m/min (60 Hz)	
Capacity per feed intake boot (*)	100 % filling	50 Hz	1000 kg/h at 22 m/min
		60 Hz	+ 20 %
Elbows		manganese steel	
Maximum auger length			
- circuit with 2 motors		160 m	
- circuit with 3 motors		240 m	
- circuit with 4 motors		320 m	
Minimum distance trough edge to perch		75 mm	
Suspension points		every 2 m	
Minimum circuit width		900 mm	
(*) Based on a specific weight of 0.65 kg/dm ³ !
